- Data structures

PROJECTS

FASHION FEET - Ecommers website to sell Shoes

Developed a comprehensive e-commerce platform specializing in Shoes, featuring an extensive range of functionalities catering to both users and administrators.

- User-friendly interfaces for essential functionalities such as cart, wishlist, product viewing and coupon management.
- Enabled payment options including Wallet Payment, Razorpay and Cash on Delivery COD).
- Admin interface features functionalities to add products, manage product categories, handle inventory management and perform image cropping.
- Integrated graphs and reports to provide insights into sales data.
- Hosted the application on AWS (EC2) and managed version control using Git.

- **Git repo** : - https://github.com/Bilal1243/fashion_feet

Technologies Used - Express, React, MongoDB, AWS, Razorpay, Multer, JavaScript,Node.js, NGINX,Twilio

ALSO USED

- Postman
- Jwt
- Figma
- Firebase

INTEGRATIONS

- RazorPay
- Twilio
- Firebase Verifications
- Multer
- EasyInvoice
- Node Mailer
- Cropper
- Google Auth
- Socket.io

EDUCATION

BROTOTYPE - Ernakulam

2023 – 2024

MERN Stack Development

GOVERNMENT HIGHER SECONDARY SCHOOL

2020 – 2022

JOBVISTA - Job Portal

Developed a comprehensive Job Portal website using the MERN stack. The platform empowers users to discover through different jobs and also allows them to share their idea's like a post, They can also create connections with different people's.

- Implemented JWT and Google Authentication for enhanced security and simplified user onboarding.
- Socket.IO for real-time communication, enabling instant user guide interactions
- Redux for robust state management, ensuring efficient handling of application-wide data.

- **Git repo** : - <https://github.com/Bilal1243/JobVista>

- **Live Link** :- <https://muhammedbilal.online>

Technologies Used - Express, React, MongoDB, AWS, Redux, JWT, Socket.IO, React Bootstrap, JavaScript, Node.js, NGINX, Nodemailer

MINI PROJECTS

Olx Clone

- This is a Cloned version of Olx with React
- It have the features like Listing New Products, View Products, Show Contact Details, Login and Signup using Firebase
- **Git repo** : - https://github.com/Bilal1243/Olx_clone_React

Netflix Clone

- This is a Cloned version of Netflix with React
- It have the features like Listing New Movies, View Trailer
- **Git repo** : - https://github.com/Bilal1243/Netflix_clone_React

Get Quran - Simple Quran Surah Provider by React

- This webpage helps you to get any Surah and you can listen it recitations also
- Get Quran Surah to read and also Provide Audios for that
- **Git repo** : - https://github.com/Bilal1243/Get_Quran

DECLARATION
