## PROJECTS

### FASHION FEET - Ecommers website to sell Shoes

- Using this platform, anyone can buy any type branded shoes.
- This project is designed and developed with scalability and maintainability in mind with **MVC architecture**.
- This project has feature like Cart, Wishlist, Online payment, Image Zooming, Cash On Delivery, Referral Bonus, Wallet, Wallet Payment, Order Status, Order Cancel, Order Return and a Beautiful Admin Side
- Admin side with user, product, category, and order management: This gives you complete control over your website, allowing you to easily add, edit, and remove users, products, and categories, as well as manage orders and track your sales and also Sales Graph.
- Planned and implemented the whole mode with REST APIS for web
- **Git repo** : - [https://github.com/Bilal1243/fashion\\_feet](https://github.com/Bilal1243/fashion_feet)
